

March 28, 2014

The Honorable Jack Kingston
Chairman
House LHHS-ED Appropriations Subcommittee
2358-B Rayburn House Office Building
Washington, DC 20515

The Honorable Rosa DeLauro
Ranking Member
House LHHS-ED Appropriations Subcommittee
2413 Rayburn House Office Building
Washington, DC 20515

Dear Chairman Kingston and Ranking Member DeLauro,

On behalf of the 42 undersigned organizations representing the Nursing Community coalition, we respectfully request **\$251 million for the Health Resources and Services Administration's (HRSA) Nursing Workforce Development programs (Title VIII of the Public Health Service Act [2 U.S.C. 296 et seq.]), \$150 million for the National Institute of Nursing Research (NINR, National Institutes of Health), and \$20 million for the Nurse-Managed Health Clinics (NMHCs, Title III of the Public Health Service Act) in your Fiscal Year (FY) 2015 Labor, Health and Human Services, Education, and Related Agencies (LHHS-ED) appropriations bill.** Collectively, the Nursing Community represents nearly one million registered nurses (RNs), advanced practice registered nurses (APRNs), nurse executives, nursing students, faculty, and researchers. Our organizations collaborate to advance sound policy decisions that promote improvements to our nation's healthcare system.

America's healthcare delivery system lies at a critical juncture. The rising demand for services, precipitated by a growing number of newly-insured patients and an aging population, calls for a greater number of highly-educated nurses. Yet, without strong investments to support nursing education, research, and practice, the nursing pipeline is unsustainable.

A 2014 projection from the U.S. Bureau of Labor Statistics' *2013-2014 Employment Outlook Handbook* anticipates that the number of practicing RNs will grow by 19% by year 2022. This projection is exacerbated not only by patient demands, but by anticipated retirements in the nursing workforce. In fact, a 2013 HRSA report *The U.S. Nursing Workforce: Trends in Supply and Education* indicates that over the next 10 to 15 years, the nearly one million RNs over age 50 (comprising approximately one-third of the current workforce), will reach retirement age. Therefore, it is essential that the Subcommittee prioritizes investments in the Title VIII programs so that future generations of nurses can be prepared to alleviate this need.

The work of NINR contributes to the body of evidence-based nursing science. Research projects funded through NINR are aimed at reducing burdensome chronic illness, improving quality of life, and promoting patient-centered care. From this perspective, NINR's unique focus on health promotion and disease prevention provide the cornerstone for advancing health and wellness.

Lastly, NMHCs offer critical access to healthcare services, often in areas experiencing a shortage of clinicians. While managed by APRNs, NMHCs are staffed by an interdisciplinary team of healthcare providers, which may include physicians, social workers, public health nurses, and therapists. In addition, these clinics often dually serve as clinical training sites for a multitude of health professions.

Again, we respectfully request that you commit to improving the nursing workforce and the health of our nation by supporting the Title VIII Nursing Workforce Development programs at \$251 million, NINR at \$150 million, and the NMHCs at \$20 million as you complete FY 2015 LHHS-ED appropriations bill. If our organizations can be of any assistance, please contact Convener of the Nursing Community, Dr. Suzanne Miyamoto, at Smiyamoto@aacn.nche.edu or 202-463-6930, ext. 247.

Sincerely,
