The Honorable Hal Rogers
Chairman
House Committee on Appropriations
Washington, DC 20515

The Honorable Nita Lowey
Ranking Member
House Committee on Appropriations
Washington, DC 20515

The Honorable Tom Cole
Chairman
Subcommittee on Labor-HHS-Education Appropriations Committee
Washington, DC 20515

The Honorable Rosa DeLauro
Ranking Member
Subcommittee on Labor-HHS-Education Appropriations Committee
Washington, DC 20515

Dear Chairmen Rogers and Cole and Ranking Members Lowey and DeLauro:

On behalf of the 56 undersigned organizations representing the Nursing Community coalition, we respectfully urge you to support our original FY 2017 requests of $244 million for the Nursing Workforce Development programs (Title VIII of the Public Health Service Act) and $157 million for the National Institute of Nursing Research (NINR, National Institutes of Health (NIH)) in your Fiscal Year (FY) 2017 Labor, Health and Human Services and Education Appropriations bill.

The Nursing Community, representing over one million registered nurses, advanced practice registered nurses, nurse faculty, researchers, and students, is committed to promoting efforts that advance the health of our nation through nursing care. As the demand for high-quality care intensifies, it is critical that investments are made in the nation’s largest healthcare workforce, registered nurses.

For over 50 years, the Title VIII programs have been able to meet the growing demand for nursing services at the community, state, and national levels due to strong, sustained funding. Administered by the Health Resources and Services Administration, these programs directly contribute to the health and wellness of American by providing care to underserved populations, increasing access to primary care, and promoting diversity to better serve all communities. For example, the Title VIII Nursing Workforce Diversity Grants supported 13,225 students in academic year 2014-2015, and partnered with over 900 clinical training sites, of which 42% were located in underserved areas. Additionally, last year the Title VIII Advanced Education Nursing Traineeships programs trained 3,008 nursing students, of which 72% were in primary care settings. The present and looming demand for high quality healthcare proves it is imperative to support the future pipeline of highly-educated nurses.

Evidence-based nursing research currently being produced at the NINR is the foundation for the care nurses provide. Nursing science is focused on reducing rates of costly, chronic diseases, promoting patient and family-centered wellness, and improving palliative and end-of-life care. NINR funds also bolster training programs that develop nurse scientists who often serve as faculty members. Our request of $157 million for NINR aligns with the Ad Hoc Group for Medical Research’s FY 2017 request for the total NIH budget of at least $34 billion.
As you continue to develop a spending solution for FY 2017, the Nursing Community urges you to help ensure the health of Americans is a top priority by supporting the **Nursing Workforce Development programs at $244 million** and the **National Institute of Nursing Research at $157 million**. If our organizations can be of any assistance, or if you have any questions, please contact the Convener of the Nursing Community, Suzanne Miyamoto, at Smiyamoto@aacn.nche.edu or 202-463-6930, ext. 247.

Sincerely,
